DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mueller, Jr. 4,938,220 in view of Norlander et al. 6,562,049. Regarding claims 1,9 and 17, Mueller discloses a sheath 19 having at distal end a radiopaque marker 10 including edges or score lines 13. Mueller is lacking for not having the sheath score lines. However, Norlander discloses as shown in figures 6-10,12 the sheath score lines 46. It would have been obvious to one having an ordinary skill in the art at the time the invention was made to modify Mueller by adding the sheath score lines in view of Norlander so that the sheath can be split and removed from the patient.

Regarding claims 2-8 and 10-12, Norlander discloses the first and second sheath score lines 46, and Mueller discloses the first and second edges or score lines 13.

Regarding claims 13-16 and 20, the exact shape of the notch and the material of the radiopaque marker would have been an obvious matter of design choice.

Regarding claims 18 and 19, note figures 1 and 2 of Mueller's reference.
